

REAR DISC BRAKE KITS

MW calipers are exceptionally strong, compact, with superior bridge strength over similar products. The material used in MW calipers is stronger than common 6061 aluminum billet calipers. All MW calipers use four 7/16" diameter body fasteners plus a 5/16" diameter bridge bolt in an effort to maximize the calipers rigidity. MW calipers utilize a 3/8" hex bleeder screws in each end, no right and left hand calipers. Internal fluid passages eliminating external damage prone lines.

Caliper mounts are billet 7075-T6 aluminum, Adapter rotor "hats" are proprietary alloy aluminum, triple drilled with 4-1/2", 4-3/4 and 5" X 5 holes drilled to accept 5/8" (11/16" shoulder) drive studs. The brake rotors are abrasive resistant steel that is double disc ground to be flat and parallel. All the required mounting hardware and MW calipers with linings are included. The Slot Drive™ rotor attachment system is a major improvement for prolonging brake rotor life. Disc cupping is eliminated with this exclusive attachment method.

Slot-Drive™ System

FORD BRAKE KITS

| | |
|---|--------------|
| 71525 Solid Steel Disc Brake Kit |1139.00 |
| <i>Large Ford housing ends with 1/2" bolts.</i> | |
| 71550 Drilled Steel Disc Brake Kit |1139.00 |
| <i>Large Ford housing ends with 1/2" bolts.</i> | |
| 71825 Solid Steel Disc Brake Kit |1139.00 |
| <i>Small Ford housing ends with 3/8" bolts.</i> | |

| | |
|---|--------------|
| 71850 Drilled Steel Disc Brake Kit |1139.00 |
| <i>Small Ford housing ends with 3/8" bolts.</i> | |
| 71325 Solid Steel Disc Brake Kit |1139.00 |
| <i>New Style Ford Ends with 3/8" bolts.</i> | |
| 71350 Drilled Steel Disc Brake Kit |1139.00 |
| <i>New Style Ford Ends with 3/8" bolts.</i> | |

CHEVROLET KITS

| | |
|---|--------------|
| 71725 Solid Steel Disc Brake Kit |1113.00 |
| <i>GM mid-size MW 58600 housing ends.</i> | |
| 71750 Drilled Steel Disc Brake Kit |1150.00 |
| <i>GM mid-size MW 58600 housing ends.</i> | |

| | |
|--|--------------|
| 71925 Solid Steel Disc Brake Kit |1124.00 |
| <i>Stock housing ends with MW "C" clip eliminator kit.</i> | |
| 71950 Drilled Steel Disc Brake Kit |1160.00 |
| <i>Stock housing ends with MW "C" clip eliminator kit.</i> | |

OLDS/PONTIAC KITS

| | |
|-----------------------------------|--------------|
| 71125 Solid Steel Disc Brake Kit |1075.00 |
| <i>Olds-Pontiac housing ends.</i> | |

| | |
|------------------------------------|--------------|
| 71150 Drilled Steel Disc Brake Kit |1095.00 |
| <i>Olds-Pontiac housing ends.</i> | |

MOPAR KITS

| | |
|---|--------------|
| 71625 Solid Steel Disc Brake Kit |1132.00 |
| <i>Mopar housing ends. Caliper mounts require modifications when using MW 53189 ends.</i> | |

| | |
|---|--------------|
| 71650 Drilled Steel Disc Brake Kit |1160.00 |
| <i>Mopar housing ends. Caliper mounts require modifications when using MW 53189 ends.</i> | |

SYMMETRICAL END KITS

| | |
|---|--------------|
| 71225 Solid Steel Disc Brake Kit |1075.00 |
| <i>MW 58580 Symmetrical housing ends, 3.150 bearing.</i> | |
| 71250 Drilled Steel Disc Brake Kit |1095.00 |
| <i>MW 58580 Symmetrical housing ends, 3.150 bearing.</i> | |
| 71230 Solid Steel Disc Brake Kit |1095.00 |
| <i>Heavy Duty Symmetrical housing ends, with 3.347" OD bearing.</i> | |

| | |
|---|--------------|
| 71280 Drilled Steel Disc Brake Kit |1095.00 |
| <i>Heavy Duty Symmetrical housing ends, with 3.347" OD bearing.</i> | |
| 71290 Drilled Steel Disc Brake Kit |1203.00 |
| <i>For 15" bead-lock wheels. Fits MW 58580 housing ends.</i> | |

4 CALIPER BRAKE KITS

| | |
|---|--------------|
| 71260 Solid Steel Disc Brake Kit, 4 Caliper |1475.00 |
| <i>MW 58580 Symmetrical housing ends. Four calipers.</i> | |
| 71270 Drilled Steel Disc Brake Kit, 4 Caliper |1495.00 |
| <i>MW 58580 Symmetrical housing ends. Four calipers.</i> | |
| 71275 Drilled Steel Disc Brake Kit, 4 Caliper |1623.00 |
| <i>MW 58580 Symmetrical housing ends. Four calipers. for 15" Beadlock wheel applications.</i> | |

71270

Some kits are available with a dual caliper configuration. Those configurations are designed to give extra holding power at the starting line.
