

## QUICK RELEASE STEERING HUBS

MW quick release hubs not only make it easier for drivers to get in and out of their cars under normal conditions, but they're invaluable in emergency situations. Our hubs feature a close tolerance between the splines in the hub and the splined mounting sleeve. This eliminates annoying "slop" common with hex style hubs and contributes to unsurpassed driver feel. All hubs incorporate a positive ball/detent lock, while the sliding collar's shape facilitates easy "two finger" operation. The chromoly 1" x 48 tooth splined sleeve (with one tooth omitted for indexing purposes) can easily be welded or bolted to any 3/4" O.D. steering shaft. Hubs are CNC machined from billet 7075 aluminum and black anodized for durability. Note: *Splined sleeve & wheel mounting hardware included w/ each hub kit.*

10020 Q/R Hub Dragster & F/C . . . . .	102.00	10060 Q/R Steering Hub . . . . .	104.00
<i>For MW wheels, 4 holes, 3/16" holes, .75 x 1.65</i>		<i>3 hole Don Long style, 10-32 thd., 3 holes on 1.375 B.C.</i>

		<i>Aircraft smooth shank bolt with washers and Jet nut.</i>	

## DRAGSTER STEERING WHEELS

MW Dragster/FC steering wheels are fully CNC machined from 3/16" aluminum. Main wheel is fully polished inside and out with your choice of anodized or polished grips. MW wheels are approximately 7 5/8" wide and 7 1/8" deep and drilled to match steering hub #10020 or D5 mount. *Switch panel mounting holes must be drilled in steering wheels*

10035 Dragster/FC Type Steering Wheel . . . . .	135.00
<i>With polished, red, blue, black or gold anodized aluminum grips installed</i>	
<i>Mounting drilled for 10020 quick release hub or D5 weld in mount. All colors same price</i>
